

The **European Traffic Law Days** are organised by the **Institute for European Traffic Law**, a Luxembourg-based association of eminent European traffic law experts and dedicated to the study, improvement and further development of the law relating to mobility in Europe. The Institute is a **forum** which attracts the majority of **interest groups directly concerned** with traffic law. The conference addresses issues selected by its members due to their particular **relevance for the development of traffic law in Europe**.

With **international mobility** reaching unprecedented levels, the professionals dealing with traffic law frequently have to address every last aspect of European traffic, indemnity and liability law. The conference program is therefore specially tailored to meet the concerns of the **practitioners of traffic law**.

Speakers of the highest calibre will make their presentations on current developments and issues, suggesting **solutions and possible improvements**, which after **discussion** among the participants **may be adopted and become the Institute's positions** and provide significant input into the further development of the law by national and European legislators, the courts, the government offices and the lawyers.

The European Traffic Law Days' annual **review of the EU legislation and court rulings in matters of traffic law** is an indispensable element of continuing professional education for all parties working in the field of traffic law.

With a view to the **massive increases in the amount of damages awarded for personal injury** in many countries throughout Europe, this is a comparative law analysis of the relation between indemnity awards and the financial status of the injuring parties and the **potential of the respective economies** and/or the financial potency of insurers in the various countries. Reputed specialists from a number of countries present the options afforded by the legislation, case-law and legal practice of their respective countries with the aim of finding relevant national solutions on the basis of a **comparative analysis of the legal and economic systems**.

Within the international claims module the **President of the Council of Bureaux**, will deliver a keynote presentation addressing the very acute problem of the **financial stability of the Green Card system**, an issue affecting all parties involved in claims settlement and their advisers. The ensuing discussion will comprehensively address the issue from all possible perspectives.

All traffic law professionals from around Europe are warmly invited to attend this event focusing on the continuous development of traffic law.
